

F SEAL Data Sheet

The Acme **F Seal** is a low breaking strength pull-tight seal manufactured from Polypropylene material. The seal can be supplied with a heat rolled over top to prevent tampering by intrusion into the locking head but if tampering is not the main characteristic the seal can be supplied without this added feature. With a 2.6mm diameter ribbon this seal is ideal for applications where there are small sealing apertures.

Technical Data

Recommended Applications

Baggage, ATM Dispensers, Gaming Machines, Fire Equipment

Material

Polypropylene

Available Operating Lengths

20cm (overall 23.5cm)
