

## ACME FREIGHT-CHECK Data Sheet

### Monitoring Solutions in Real Time for Dry and Refrigerated Containers

ACME-Freight Check is available in two different models to perfectly meet different usage requirements:

- For Dry and Refrigerated Containers
- For Dry Containers

#### Information available:

- Position of the container; will be provided by the GPS function and shown as a landmark on the map, an address or coordinate.
- Door open / closed.
- Battery charge level.
- Lighting level in the container; may indicate that the container door has been left open or imply that there has been an attempt to break-in.
- Temperature; significant for temperature sensitive cargo.
- Humidity; significant for humidity sensitive cargo.
- Impact; in order to warn about possible events of force or impact brought upon the container including loading and unloading.
